HARDWOOD FLOORING ADHESIVE

PUM-950 POWER-MASTIC®

- Moisture cured urethane adhesive
- Contains no isocyanates to etch finishes or harm installers
- NO MOISTURE TESTING REQUIRED
(using #12 trowel)
- Has higher shear strength than competitors
- Contains no solvents
- Contains no VOC (calc. per CA Rule 1168)
- Certified "green"
- Freeze/thaw stable

STAUF®

— ADHESIVES SINCE 1828 —

SMP-960

ONE-STEP

- NO MOISTURE TESTING REQUIRED
- Provides sound barrier up to STC & IIC of 72 and 74 Db (Meets or exceeds all condo corporation requirements)
- Contains no isocyanates
- Contains no water
- Contains no solvents
- Contains no VOC
- Freeze/thaw stable
- Bridges cracks

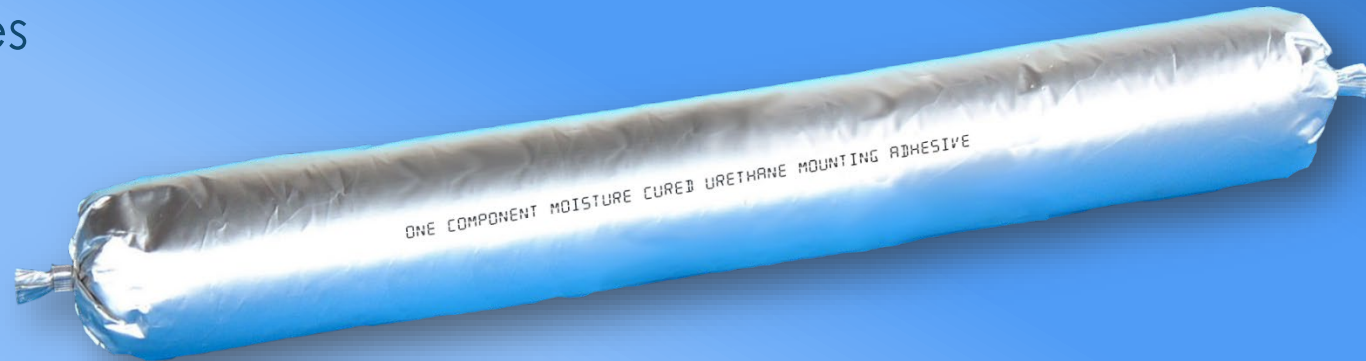

STAUF®

— ADHESIVES SINCE 1828 —

PUM-955 ULTRA-NAIL®

- Sausage pack to be used with sausage tool
- works like nails in a tube
- contains no isocyanates
- contains no water
- high shear strength
- Freeze/thaw stable
- contains no VOC

ENDURA TAC M400

STAUF

Premium Universal Flooring Adhesive

Use With:
 -Hardwood
 -Ceramic & Stone
 -Vinyl Planks
 -Turf & Rubber
 -Cove Base
 -Stair Nosing

30 Minute Quick Setting Repair and Mounting Adhesive
 Contains 30 Cartridges of 10.3 fl. oz. (310 ml)

Pre-Installation Checklist: A successful installation requires proper preparation of the sub floor, level and condition of the adhesive and technical data sheet before beginning. Always follow industry standards and flooring manufacturer's instructions for sub floor preparation, strength, level and application of flooring materials. Sub floor conditions: Prior to installation, the sub floor must be checked according to national standards. Cracks, holes and major level deviations must be repaired to promote and ensure installation. Remove all loose material using a chisel, pry, brush, vacuum, etc. and patch them immediately and permit them to dry. Limitations: In case of cracking, repair, seal or grout, use RUC-10 sealant for water. Consult technical data sheet at www.staufusa.com for updated information. General Features: epoxide cured urethane, 1110 qualified, contains no volatile organic compounds, conforms to VOC regulations, high solids content, low moisture sensitivity. Installation Features: grade checker, low shrinkage, wet lay - no flash step, equipped, requires green, glossy low color, forms with no fibers, dries quickly, higher temp. is 111 min (shorter drying time). Long term features: resistant against aging, moisture, alkalis, suitable for outdoor heat systems, adhesive is waterproof when cured. Approved Flooring Method: Flooring: Ceramic & Stone, Synthetic and Natural Stone, Laminate Flooring, Vinyl Planks, Rubber Flooring, Liner Flooring. Approved Sub Floor: Concrete Slabs, GCR Reinforcement grade, Plywood, Reinforcement grade, Concrete Form, Stone, Brick, Camel Backing, Copings, Hardwood, Hardwood Plank, Hardwood Panel, Hardwood Strip, Hardwood Treads.

Top: Metal Floors, Asphalt, Epoxy, Epoxy Resin, White, Green, Dry, Wet, Duster
Can Time and Normal Traffic: up to 20 minutes
Shrinkage: Use STAUF EPOXY if needed. Use STAUF EPOXY white and
Room Conditions: 30-100°F, 20-80% RH
Net Weight: 10.3 oz (290 g)
Net Volume: 310 ml (10.3 fl. oz.)
Storage: Store in original unopened container.
