# HOMERWOOD®

PREMIUM HARDWOOD FLOORING

HomerWood is committed to protecting the environment and communities in which we work. That's why we plant 2.29 trees for every tree we harvest. It's just one of many eco-friendly practices we uphold. For details, visit [homerwood.com](http://homerwood.com).

Made from responsibly harvested lumber from the Appalachian region and manufactured in the USA.

## *Why HomerWood?*

Made and manufactured in the USA

*Unsurpassed* Quality

*Superior* Construction

*Inherent* Durability

**Allow nature to customize your floor.™**

## *Thank You*

Thank you for learning more about HomerWood®

Premium Hardwood Flooring. Our floors are beautifully preserved and reveal all of the trees' natural perfections, including original markings, distinctive graining, and inherent characteristics.

While planks may feature a distinctive array of knots, splits and checks, pith and sap content; we take special care to remove any defects that could weaken the floor. The result is an elegant, premium floor that features both clear and character planks that reflect the greatest attributes of natural wood.

Our extraordinary work ethic and attention to detail are reflected in every aspect of producing a one-of-a-kind HomerWood floor; including hand selection of boards, Amish Hand Scraped® artistry and personal determination of quality.

Traditional Character / Hickory Graphite

## *Traditional Character™ Collection*

Crafted from the entire tree, all of nature's beautiful, distinctive markings are preserved. These one-of-a-kind markings are highlighted beneath a smooth durable finish. The result is an elegant floor that features both clear and character planks.

## *Amish Hand-Scraped® Collection*

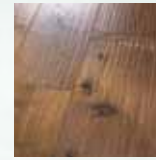

Every plank in this collection is hand-scraped by local Pennsylvania Dutch craftsmen. Unlike most of today's machine distressed flooring, HomerWood floors are truly fashioned by hand from premium quality hardwood. No two planks are the same, and like a true piece of art, each plank proudly bears the signature of the craftsman who created it.

### HARDNESS

Ranked by Janka Hardness Rating

The mark of responsible forestry

Our flooring contains natural occurring character marks that may include open and filled knots, splits, checking, minimal sap, mineral streaks, color variations, embodied cracks and variations in grain. Natural color variation in raw material will dictate the final shade of stain. Since every tree provides us with its own unique natural characteristics, your newly installed floor may vary from samples or pictures shown. Wood will react to changes in moisture and humidity. In order for your floor to perform properly, indoor humidity should be maintained between 35-55% year round. Follow NWFA guidelines and use a NWFA certified installer.
