

WINTER CURING BLANKET FOR CONCRETE

POLYAIR
feel protected

- > Made of two layers of 1¼" diameter and 7/16" thick bubbles for a total thickness of 7/8"
- > All edges are sewn to prevent water infiltration
- > Metal grommets are placed at all corners to allow the blankets to be attached together
- > Made of a solid black polyethylene that allows the blanket to be reused
- > Accrued durability
- > Available in sizes of 8' x 25'
